## **AMPUTEE DRIVER REQUIREMENTS, DRIVER REHABILITATION PROGRAMS & ADAPTIVE DRIVER EQUIPMENT SUPPLIERS**

### **AMPUTEE DRIVER REQUIREMENTS**

New amputees MUST notify the Maryland Motor Vehicle Administration (MVA) to report their conditions ASAP, especially when applying for or renewing a driver's license. The MVA's Driver Wellness & Safety Division (DW&S) and/or Medical Advisory Board (MAB) will assess the medical fitness to drive of individuals whose limb loss can impact on their ability to safely operate a motor vehicle. Self-reporting individuals' driver's licenses remain active pending medical review, and self-reports can be done at the MVA office, or can be submitted at any time by fax to the MVA's Driver & Wellness Safety Division (DW&S), as follows:

Maryland Motor Vehicle Administration (MVA) –  
Driver Wellness & Safety Division (DW&S)  
6601 Ritchie Highway  
Glen Burnie, MD 21062  
TEL. 410-768-7511 EXT 1 (MVA Driver Control Division)  
410-768-7000 (MVA Customer Service Center)  
410-768-7627 (FAX)

The following Nurse Case Manager is a senior MVA Driver & Wellness Safety Division (DW&S) staff member. While the telephone numbers above will get people in touch with staff who can provide/mail out required documents that must be filled out by drivers AND THEIR DOCTORS to initiate the medical review process, the following staff member may be able to expedite the process.

Dennaia Carter, Nurse Case Manager, Driver Wellness & Safety Division  
TEL. 410-768-7513

### **DRIVER REHABILITATION PROGRAMS**

Following the REQUIRED assessment of a new amputee's fitness to drive, the MVA's Driver Wellness & Safety Division (DW&S) and/or Medical Advisory Board (MAB) may or may not determine that an amputee needs to attend a Driver Rehabilitation Program (each case is reviewed on an individual basis and comorbidities are factored in.) These programs are administered by Driver Rehabilitation Specialists who provide in-office clinical assessments, followed by on-the-road driving evaluations. Participants are required to obtain prescriptions from their doctors for these programs and unfortunately, these programs are NOT covered by insurance.
